

COVID-19 / SAFETY GUIDE

- ✓ Ships will stop Stevedores ID checks at gangway point on deck, to avoid any gathering of people and limit contacts
- ✓ Stevedores managers are consequently responsible to secure that same amount of labours boarding the ship for operations is to disembark upon completion

Body temperatures checks of the stevedores to be done ashore prior boarding by terminal management (unless authorities requirements are different) to minimize contacts between crew and labours / shore personnel

Social distancing of 1 meter during climbing of the gangway and walkways on board must be followed

- ✓ Accomodation access forbidden for any stevedores or shore personnel unless authorized by agent prior to boarding
- ✓ Port Watchmen : unless Port regulations impose it on deck (agents to advise), watchmen personnel to be located ashore on the quay near access points to the vessel, proceeding all necessary checks without crew physical assistance but can assist by phone / vhf. Crew occasionally can count from afar (minimum 2 meters distance) the number of people boarding and check it from time to time with security records

Docs : signing and approval of all cargo and other docs should be organized by e-mail as much as possible. Requesting agents / terminals for any stowage and other operational issues to be first reported by radio, phone calls, emails. Photos can be very useful instead of making copies etc

- ✓ Crew and Shipmanagers thank Port and all other authorities involved during the portstay for any positive and cooperative action that can be taken
- ✓ Joint objective and priority are for ALL people other than Stevedores to stay ashore, not entering into ship accommodation (stay at best on the main deck if shore not possible)

AEL & Crews are asking here our agents to relay this message to their respective Port Authorities to adjust and implement local Port regulations to keep ship and shore personnel separate for each other whilst keeping performing their daily business

The above is for everyone's safety and only together Covid will be defeated!
